

GitHub Store code

Railway Host server 24/7

TradingView Send
signalsRobinhood Execute
trades**1 GitHub — Store Your Code**

- Go to github.com → Sign up (free)
- Click + → New repository
- Name it orb-trader → Create
- Click 'uploading an existing file'
- Open your orb-v6 folder. Drag ALL contents (not the folder itself) into GitHub
- Upload the contents of orb-v6, not the zip file.
- Click Commit changes

2 Railway — Run Your Server

- Go to railway.app → Login with GitHub
- New Project → Deploy from GitHub repo → select orb-trader
- Click Variables tab → add these two:

```
RH_EMAIL = your Robinhood email
```

```
RH_PASSWORD = your Robinhood password
```

```
RH_ACCOUNT_NUMBER = your account number
```

```
RH_DEVICE_TOKEN = token from robinhood.com browser session
```

■ Device token: log into robinhood.com in Chrome, press F12, Network tab, click any api.robinhood.com request, find device_token in the payload. Copy it exactly.

- Settings → Networking → Generate Domain → copy your URL
- Verify: visit URL/health → should show {status: running, auth: connected}

3 TradingView — Set Up Alerts

- Open SPY chart on 5-min timeframe
- Add Katalyst ORB indicator → set to 5 min
- Create Alert 1 (ORB Set, fires at 9:35 AM):

```
{"ticker":"SPY","event":"orb_set","orb_high":{{plot("ORB High")}}, "orb_low":{{plot("ORB Low")}}}
```

- Create Alert 2 (every 5-min bar close):

```
{"ticker":"SPY","event":"bar_close","close":{{close}}}
```

- Repeat both alerts for IWM chart (replace SPY with IWM)
- Webhook URL for all alerts:

```
https://YOUR-RAILWAY-URL/webhook
```

- Set all alerts to never expire

4

Robinhood — Get Your Tokens

- Open Chrome → go to robinhood.com → log in
- Complete 2FA verification on your phone
- Press F12 → Network tab → Fetch/XHR filter
- Find token/ request with status 200 → click it
- Click Response tab
- Copy access_token value → Railway as RH_TOKEN
- Copy refresh_token value → Railway as RH_REFRESH_TOKEN
- Add RH_ACCOUNT_NUMBER → your Robinhood account number

■ Do this immediately after logging in before the token expires.

5

Set Contract Size & Go Live

- Open your Railway URL in any browser
- Find Set Contract Size in the top panel
- Enter how many contracts for SPY and IWM

■ Start with 1 contract each until you're comfortable.

- Click Set — takes effect on the next trade
- Top bar should show green Connected dot
- If disconnected: click Reconnect — enter SMS code if prompted
- You're live. Fully automatic every trading day.

STRATEGY RULES

ORB	9:30-9:35 AM ET - first 5-min candle
ENTRY	Close above ORB high = call, below ORB low = put. Half position first, add half on retest within 0.1%
STOP	Close beyond ORB midpoint = full exit. At +50% gain, stop moves to breakeven (entry price)
PROFIT	Every +20% sell 10%. At +100% sell 50%. Daily/weekly/monthly expected move = sell 90%
CROSS	IWM breaks ORB first = auto-enter SPY same direction. Stop = opposite SPY ORB level
